I've seen a lot of Among Us videos of people hacking with mod menus, one in particular. I play a lot with friends and it'd be fun to mess with them, but I can't find anything legit anywhere on the internet, just the usual scammy viruses and fake links. Does anyone know a reliable, no-BS mod/hack software and where to get it? Are there any?

TLDR; Among Us proximity voice chat is now available for public use and possible without having anyone download anything. Uses website/browser for voice chat, by default it takes a slot in your lobby so you can only play with at most 9/10 players.

Crewmates can win by completing all tasks or discovering and voting the Impostor off the ship. The Impostor can use sabotage to cause chaos, making for easier kills and better alibis. Choose from 5 maps and 1-3 Impostors to better suit your own playstyle!

Can't join another game with a code, it always says "game not found", my friends also can't join my lobby. Sometimes it also says that they are running an older version. Steam can't connect to steam, and ios can't connect to ios, it's strange.

Im currently using a MacBook Pro 2021 (non-silicon) and I am searching for a way to play Among Us. Steam only offers Among Us on Windows and downloading an emulator on MacOS Ventura is too complicated. Is there another way to play Among Us without going into recovery mode like emulators?

This redesign changed everything to make it easier for everyone. Other improvements include simplified forum viewing/posting, improved chat system, improved site-searching/navigation, and improved ability to manage groups and groups permissions.

According to a report by "The Guardian", Roblox has been criticized for being a "digital playground" that involves more than 50% of their users under the age of 18. The report states that there are over 200 million players on Roblox who have access to weapons and themes that include sexual references and violence. They also said that Roblox emphasizes the idea of user privacy which can be seen in their games by having players invite other users via email or text messages.

This may sound like a simple bug but there are so many people who want this fixed because it makes them very mad. When they are in a group with someone who they hate and they click the chat head and they try to type something and it doesn't show up. I know that there should be a way for them to see what they were typing but there is not. That's the only thing that bugs me about this bug because it makes people mad.
